KHALED TUJJAR

Orlando, Fl · khaledtujjar2002@gmail.com · 4075905575 · https://khaledtujjar.com/

EDUCATION

University of Central Florida   Orlando, FL
BS Computer Science GPA: 3.44   August 2020 - August 2024

TECHNICAL SKILLS

Languages: Java, C, Python, HTML, CSS, JavaScript, TypeScript

Developer Tools: React, Angular, Git, Eclipse, VS Code, Microsoft Office

ACTIVITIES

Knight Hacks   August 2020 - May 2024
Member - Orlando, FL

- Improved technical skills by learning more programming languages and developer tools.
- Developed a multitude of applications utilizing Firebase, JavaScript, Go, and several other technologies alongside the club.
- Competed in the Knight Hacks annual Hackathon and improved team working skills

Google Student Developer Club   January 2020 - May 2024
Member - Orlando, FL

- Learned about game development, building a discord bot, HTML, CSS, and JavaScript at Google Developer Club hosted events and workshops
- Provided information on how to approach developing a portfolio site and a technical interview

PROJECTS

RocketDocs *TypeScript, React, Tailwind*   https://github.com/ryanata/rocketdocs-frontend

- Worked on the front-end for my Senior Design project and gained more experience in using TypeScript, Tailwind, and React
- Rocketdocs is a full-stack web application that generates documentation for codebases using LLMs.

SnakeEyeGaze *Python*   https://github.com/kevng2/SnakeEyeGaze

- Gained more experience with Python and learned efficient ways to collaborate with a group to finish a project while developing SnakeEyeGaze
- SnakeEyeGaze is a snake game where the user can control the snake with the movement of their eyes
- Won Knight Hacks 2020 beginner project award

Contact Manager *HTML, CSS, JavaScript*   https://github.com/Quinn-Barber/Remote-Database

- Learned how to develop the front-end of a full-stack application using HTML, CSS, and JavaScript
- The application allows the user to store their contacts after logging into or registering an account

Pwdly *JavaScript, React-Native, Expo*   https://github.com/ryanata/password-manager

- Learned how to make a mobile application using React-Native and JavaScript while utilizing Expo
- Pwdly is a web and mobile application that allows users to store their passwords safely within different user made vaults that have different master-passwords
- Includes two-factor authentication for extra security and a password generator with a strength bar

EXPERIENCE

TrillSites   May 2024 - Present
Software Engineer Intern - Orlando, FL

- Developed communication skills and learned how to efficiently work with a team to develop web applications
